

# EVRIPIDIS GKANIAS

PhD student in Bio-inspired Robotics & Autonomous Systems

✉ ev.gkaniias@ed.ac.uk

🌐 evgkaniias

🌐 uk.linkedin.com/in/evgkaniias

📍 University of Edinburgh, UK

## WORK EXPERIENCE

### Research Associate in Computational Modelling

University of Edinburgh & University of Sheffield

📅 Mar 2017 – Aug 2018

📍 United Kingdom

👤 Advisors: **Prof. Barbara Webb** & **Dr Michael Mangan**

⚙️ Investigate the celestial properties in context of animal navigation

🔧 Design a novel anatomically-constrained celestial compass

### Research Assistant in Bio-robotics

University of Edinburgh

📅 Sep 2016 – Feb 2017

📍 United Kingdom

👤 Advisor: **Prof. Barbara Webb**

🔬 Study the learning mechanism of *Drosophila* larva

🔧 Build a robot that tries to find the gustatory source following the gradients of the associated odour

### Research Assistant in Machine Learning

Centre for Research and Technology - Hellas (CERTH)

📅 June 2014 – Aug 2015

📍 Greece

👤 Advisor: **Dr Petros Daras**

📊 Real-time evaluation of athletes' technique from gestures captured using multiple Microsoft Kinects and WIMUs or the Vicon system

🔧 Integrate into a video game using C# and Unity3D

## CONTINUOUS TRAINING

### CapoCaccia: Neuromorphic Engineering Workshop

University of Zurich, ETH Zurich and the iniForum

📅 Apr 2018 – May 2018

📍 Sardinia, Italy

🔧 Work on the neuromorphic SLAM project using Brian2

🔧 Attach a DYNAPs neuromorphic chip on a robot and programme it to learn a map using a bumper sensor

## EDUCATION

### PhD in Bio-inspired Robotics & Autonomous Systems

University of Edinburgh

📅 Aug 2022 (exp)

📍 United Kingdom

📖 Insect neuroethology of reinf. learning

👤 Supervisor: **Prof. Barbara Webb**

🏆 Robotics and Autonomous Systems CDT

### MSc in Artificial Intelligence

University of Edinburgh

📅 Aug 2016

📍 United Kingdom

🎓 with Distinction

📖 Data-driven adaptation of the evasion behaviour in fiddler crabs

👤 Supervisor: **Prof. Barbara Webb**

🏆 EU/UK Masters Scholarship

### BSc (Hons) in Computer Science

Aristotle University of Thessaloniki

📅 Jul 2013

📍 Greece

🎓 Grade: first-class

📖 Deep learning algorithms for multi-label data

👤 Supervisor: **Prof. Grigorios Tsoumakas**

## FUNDING & AWARDS

### Percy Sladen Memorial Fund Grant

The Linnean Society of London

📅 Jun 2019

📍 Seville, Spain

🔬 Fieldwork experiments on desert ants

🔬 Test for vector-sequence memories during path integration

### Robotics and Autonomous Systems - Centre for Doctoral Training Grant

Engineering and Physical Sciences Research Council (EPSRC)

📅 Sep 2018

📍 Edinburgh, UK

🏆 Awarded to the top 10 applicants

### UK/EU Master's Scholarship

University of Edinburgh

📅 Sep 2015

📍 Edinburgh, UK

🏆 Awarded to the top 100 UoE entries

## ORAL PRESENTATIONS

- 🗣️ *How flies acquire, forget and assimilate memories: a computational perspective.* At the Mushroom body meeting. Jun 2021. Online
- 🗣️ *From skylight input to behavioural output: a computational model of the insect polarised light compass.* At the International Navigation Conference. Oct 2019. Edinburgh International Conference Centre, United Kingdom
- 🗣️ *Predator evasion by a Robocrab.* The living Machines. July 2017. Stanford University, CA, USA

## POSTER PRESENTATIONS

- 📄 *An anatomically accurate circuit for short- and long-term motivational learning in fruit flies.* At the Cosyne Conference. March 2022. Lisbon, Portugal
- 📄 *The incentive circuit of the fruit fly brain: a computational perspective.* At the Bernstein Conference. September 2021. Online
- 📄 *Robustness of a model of the insects' celestial compass in realistic conditions.* At the International Conference on Invertebrate Vision. August 2019. Bäckaskog Slott, Sweden
- 📄 *Imitating the Drosophila larval learning behaviour on a robot.* At the Maggot Meeting. October 2018. University of Edinburgh, United Kingdom

## UNIVERSITY THESES

### Insect Neuroethology of Reinforcement Learning

#### Thesis — Doctor of Philosophy

📅 Sep 2018 - Aug 2022 (expected) 📍 University of Edinburgh

We are looking for the underlying mechanism that allows reinforcement learning in insects. Based on recent findings on how dopamine affects the synaptic weights in the fruit fly brain, we develop a novel plasticity rule that allows for the observed memory dynamics, e.g., primitive, flexible or long-lasting memories, depending on the circuitry. We identify an anatomically accurate self-motivated circuit in the fruit fly brain, that can explain a big volume of neural and behavioural data in olfactory conditioning. We now test the found plasticity rule for different benchmarks in reinforcement learning, with the ambition to apply it for autonomous navigation in natural environments.

### Robocrab: data-driven adaptation of the evasion behaviour in fiddler crabs

#### Dissertation — Master of Science

📅 Jun 2016 - Aug 2016 📍 University of Edinburgh

We create a semi-supervised structure of neural network, inspired by the physiology of neurons in fiddler crabs, and train it to adapt the evasion behaviour of fiddler crabs on potential predators, solving a complicated visuomotor problem (developed in Python using the Theano/Tensorflow-based 'keras' library)

### Deep learning algorithms for multi-label data

#### Honours Thesis — Bachelor of Science

📅 Oct 2012 - Jul 2013 📍 Aristotle University of Thessaloniki

We extended a Java library implementing Restricted Boltzmann Machines and Deep Belief Networks and we used it to examine how they perform in a variety of multi-label data-sets.

## RESEARCH INTERESTS

- 🧠 Biologically plausible mechanisms of **learning** and **memory** that allow interpretive **behaviour** in artificial agent
- 🧠 **Computational intelligence** that allows artificial agents to **navigate** in the challenging real-world
- 👁️ Processing **perception** in order to **maximise information** and create hierarchical representations

## STRENGTHS

Research  
Bio-accurate AI  
Computational Modelling  
Probab. Machine Learning  
Information Theory  
Computer Vision  
Python

Reinforcement Learning

Robotics

OpenCV

C{#, ++}

## TEACHING POSTS

### Tutor, Demonstrator & Marker

#### University of Edinburgh

📅 Sep 2018 - 2022 📍 United Kingdom

📚 Introductory Applied Machine Learning

### QA & Computer Vision Expert

#### University of Edinburgh

📅 Jan - Apr 2020 📍 United Kingdom

🔧 Systems Design Project

### Tutor

#### University of Edinburgh

📅 Jan - Apr 2019 📍 United Kingdom

🧠 Reinforcement Learning

## ACTIVITIES

### Hacker

#### Junction Hackathon

📅 Nov 2016 📍 Helsinki, Finland

🏆 Winners: "Artificial Intelligence Driven Bots" challenge (Microsoft & Skype)
